TRENDS AND HIGHLIGHTS
Special Security Center
November 1974

1. The month of November saw considerable progress in the preparation of the TKH Manual by representatives of the SSC. A draft version of the Manual has been disseminated to members of a COMIREX ad hoc working group, and it is hoped that this draft, incorporating suggested changes, will be disseminated to U. S. Intelligence Board Members before Christmas.
2. Progress was also made on SSC's MBO to upgrade the quality of compartmented intelligence security indoctrinations of CIA personnel. Commencing 3 December a pilot program will be initiated to determine the feasibility of conducting such briefings in groups on regularly scheduled basis, instead of the present individual "as you show" basis. This should result in manpower savings. By January, it is hoped to have suitable slide viewgraphs to compliment the 25X1A security briefings.
